Abraham Orestes Ruiz Pestana

Habramruizpestana@gmail.com | Github: AbrahamRuizP

Software developer with experience building web applications and data-driven systems using Java and modern web technologies. Strong analytical mindset with a focus on solving complex problems and delivering scalable, maintainable solutions.

SKILLS:

Frontend: React, HTML, CSS, Hilla

Backend: Java, Spring Boot

Databases: SQL (PostgreSQL, MySQL)

Tools: Git, Docker

Other: FileMaker, XML

Languages: English (B2/C1), Spanish (Native)

SOFT SKILLS:

- Analytical thinking and problem-solving
- Clear and structured communication
- Attention to detail
- Strategic thinking

PROJECTS:

1. **XML Diff Analyzer (Data Analysis Tool)**

Tool for comparing FileMaker XML files and detecting structural changes across versions.

- Built a system to analyze and compare complex XML structures
- Detects and analyzes changes in tables, fields, layouts, and scripts
- Identifies broken references across system components
- Implements scoring logic to evaluate impact of changes
- Designed to reduce debugging and migration analysis time

Tech: Hilla, Vaadin, Java, SQL

2. **SimpleBizz (Business Management Platform)**

Business management web application for handling operations, scheduling, and payments.

- Developed a full-featured system for managing customers, services, employees, and operations
- Implemented scheduling system with calendar-based job management
- Built modules for quotes, jobs, and invoice generation
- Integrated payment processing with Stripe and Square
- Designed gamification system to improve customer engagement and retention

Tech: Hilla, Vaadin, Java, SQL

Link: simplebizz.app

3. **CRM System (Business Management Platform)**

Comprehensive CRM system built in FileMaker to manage end-to-end business operations.

- Designed and developed a full business management system covering customers, vendors, services, and operations
- Implemented modules for quotes, jobs, invoices, purchase orders, and billing workflows
- Built scheduling system with calendar integration for job and quote management
- Developed role-based access control for users, teams, and permissions
- Created automated workflows including email notifications and templating system
- Implemented reporting and dashboard system for business insights
- Integrated external services including QuickBooks Online, SignNow, Google Maps, and shipping APIs (FedEx, USPS, UPS)

- Developed mobile-friendly features for field employees and real-time operations

Tech: FileMaker

Integrations: QuickBooks, SignNow, Google Maps, FedEx, USPS, UPS

4. **TLM (Authentication & Authorization System)**

Backend system implementing secure authentication and authorization using JWT and Spring Security.

- Designed and implemented JWT-based authentication and authorization flow
- Built secure login, registration, and token validation mechanisms
- Developed refresh token strategy for session management
- Structured application using layered architecture (Controller, Service, Repository)
- Integrated Spring Security for role-based access control (RBAC)
- Configured database interaction using Spring Data JPA
- Implemented custom security filters to validate and protect API endpoints

Tech: Java, Spring Boot, Spring Security, JWT, JPA, PostgreSQL/MySQL
